## Reply: Investigating actions of changing hormone levels

Roy Homburg<sup>1,2</sup> and Shahar Kol<sup>3,4</sup>

Sir,

We thank Dr Neves-e-Castro for his interest in our paper and for providing further examples that as far as hormonal influence on reproductive function is concerned, nothing is as simple as it would appear from sample serum concentrations. The examples that Dr Neves-e-Castro provides should induce further thoughts and research into hitherto uncharted waters.
